WEBMAN, EDWARD J

ART UNIT PAPER NUMBER

1616

DATE MAILED: 03/15/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/054,490	Applicant(s) PRIKOSZOVICH, WALTER	
	Examiner Edward J. Webman	Art Unit 1616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 December 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 53, 55-58, 60, 64, 66-68 and 74-82 is/are pending in the application.
- 4a) Of the above claim(s) 55 and 57 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 53, 56, 58, 60, 64, 66-68, 74-82 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1616

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 53, 56, 58, 60, 64, 66-68, 74-82 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bodmer et al (US 5,538,739) in view of GB 2,145,422 and Reiners et al (US 4,879,402).

Bodmer et al teach a matrix comprising octreotide (abstract). Linear polylactide –coglycolides of MW 25K-100K and a polydispersity of 1.2-2 are disclosed (column 8 lines 1-4). Star polymers are specified (column 8 line 35). Esters with glucose are disclosed (abstract). Lactide glycolide ratios of 60:40-50:60 are specified (column 8 lines 14-20). A method of making using that of GB 2,145,422 is specified (example 2). However, Bodmer et al do not teach removal of Sn octoate.

GB '422 teaches a method of making the polymer wherein the catalyst Sn octoate is preferred (page 2 line 41). Purification in the conventional manner is disclosed (page 2 line 47).

Reiners et al teach making a polymer using tin octoate (column 18 example 5). Filtration over active charcoal to obtain a colorless product is disclosed (column 18 lines 44-45).

It would have been obvious to one of ordinary skill to purify the polymer of Bodmer et al using activated charcoal in view of the teaching in GB '422 to use a

Art Unit: 1616

conventional purification technique and further in view of the teaching in Reiners et al that, in a method of making a polymer using Sn octoate, the beneficial effect of purification to clarity is achieved using activated charcoal.

As to the particular degree of purification, an optimal such degree can be achieved by routine experimentation, especially in view of the Reiners et al teaching of purification to clarity.

Applicants argue that purification to clarity taught in Reiners et al does not indicate removal of tin, that the brown color removed mostly concerns degradation product, and that the reference is silent regarding removing tin and final tin content. However, GB '422 teaches purification using conventional means as well as a tin octoate catalyst. Reiners et al also teaches a tin catalyst and additionally use of charcoal. Clearly, the goal of purification after the making of a polymer is to remove all impurities, including the catalyst. Given the teaching of GB '422 one of ordinary skill would look to Reiners et al for a specific teaching of a means of purification. Applicant is arguing the references separately, rather than as a combination. Further, one of ordinary skill would recognize that charcoal will bind to the long octanoate chain, removing the tin counter ion. Applicants' assertion to the contrary is mere opinion. As to the date of issue of the prior art, one of ordinary skill at the time the invention was made will have access to all the references; that is, rendering the date of issue of each of no import.

No claims allowed.

Art Unit: 1616

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Webman whose telephone number is 571-272-0633. The examiner can normally be reached on M-F from 8 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Padmanabhan, can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Art Unit: 1616

Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
